### **The Crisis in Indian Education**

India has been undergoing deepening crisis so far as quality, quantity and equality are concerned. Privatisation of education has been going on at a rapid pace in India for the past few decades. The Right to Education Act was enacted in India in 2009; however, it was passed with provisions required for privatization of education.

As a result, the Indian government did not succeed in preventing the growth of child labour and out-of-school children. A study of 20 states in India between 2010-11 and 2015-16 found that 1.3 crore students decreased in these states; while private schools grew by 1.75 crore students. The number of students per school declined from 122 to 108 and the number of students in private schools increased from 202 to 208. According to data from the District Information System for Education (DISE) and the Ministry of Education, 65% of the total students are studying in government schools. According to a study by Geeta Gandhi Kingdon, a professor at the Institute of Education in London, the quality of education in government schools is lower than that in private schools. This is a cultural strategy designed by the senior class of India to ensure that the lower caste group in India does not educate and promote.

Basically, the Indian education system is considered to be one of the poorest education systems in the world. According to the 2011 census, as many as 8.5 crore children were out of school in India. They are often from the lower castes and the working class. It was recently found in a nomadic tribe settlement in Marathwada that hardly any adult was literate in this 150-strong settlement and no child had been enrolled in the school. According to the Global Monitoring Report, India has been at the bottom of the world for the last several years in terms of educational achievement.

The National Education Policy, 2020 is committed to address the problem of privatisation of education. Hopefully, this does not turn out to be just a lip service.

- **Dilip Chavan**  
SRTM University, Nanded

--

One of the things they want is a passive quiescent population. So one of the things that you can do to make life uncomfortable for them is NOT to be passive and quiescent. -

Noam Chomsky

**Dr. S. C. Dhawale,**  
**Professor**  
**School of Pharmacy, SRTM University, Nanded**

---

**Abstract:**

National Education Policy -2020 focuses on Holistic and Multidisciplinary Education. Our traditional Indian education system also given due importance of multidisciplinary and holistic education. This also finds its roots in Takshasheela and Nalanda University, like Greece. Students can learn sciences, technologies, mathematics with liberal arts, humanities, languages, social sciences, professional skills, vocational skills, ethics, morality, human values and so on at the same time. It aims at overall development which means now students can have knowledge or mastery across fields.

Holistic education ensures in overall development of students. Banbhatta has mentioned definition of good education as i.e. 64 *KALAS*. Hence multidisciplinary education is the need of the time. Students can better understand any course by the different experts and by the different perspectives.

**Dr. Kamlesh J. Wadher**  
**Professor,**  
**SKB College of Pharmacy, Kamptee, Nagpur**

---

**Abstract:**

Education is the backbone of any country, it plays a crucial role in technological developments and imparts various skills, values, and awareness. The teacher must be at the centre of the fundamental reforms in the education system. The New Education Policy believes that the education system should develop good human beings with rational thinking, compassion, empathy, courage, resilience, scientific temper, Skilled, Entrepreneurial mindset, Innovator, creative imagination, and ethical values. NEP has the potential to revamp the skills of the youth of our country and has all the right tools that are needed to be competitive at the global level. NISP policy intends to guide HEIs for promoting students' driven innovations & start-ups and to engage the students and faculty in innovation and start up activities in campus. The policy aims at enabling HEIs to build, streamline and strengthen the innovation and entrepreneurial ecosystem in campus and will be instrumental in leveraging the potential of student's creative problem solving and entrepreneurial mind-set, and promoting a strong intra and inter-institutional partnerships with ecosystem enablers and different stakeholders at regional, national and international level. The proportion of the working-age population in India is expected to go up to 65% and third of the working age population in world will be from India by 2030. Developing "Entrepreneurial Culture" Need of Hour. As India aspires to become 5 trillion GDP economy by 2024, it is very important to achieve Excellency in both quantitative and qualitative growth of education system by making it globally relevant, competitive and industry fit while simultaneously focusing on self-employment through sheer emphasis on innovation, skills and entrepreneurship among students and faculty.

**Dr. Vitthal Singh Parihar,**  
**Director,**  
**Sport and Physical Education, SRTM University Nanded**

---

Abstract:

- Students are the prime stakeholders in the education system. Vibrant campus life is essential for high-quality teaching-learning processes. Towards this end, students will be given plenty of opportunities for participation in sports, culture/arts clubs, eco-clubs, activity clubs, community service projects, etc. In every education institution, there shall be counseling systems for handling stress and emotional adjustments. Furthermore, a systematized arrangement shall be created to provide the requisite support to students from rural backgrounds, including increasing hostel facilities as needed. All HEIs will ensure quality medical facilities for all students in their institutions.
- The legendary Nelson Mandela addressing a group of young sportsmen, had once said that he did not know how many of them would go on to play the sport professionally, but what he did know was that amongst that group were future doctors, lawyers, accountants and other professionals who would use the life skills and attitudes learnt from playing sports, in their future lives.
- The new education policy of has already pushed in the national committee to make sports an integral part of the education system.

The Govt. formed a high-level committee for the formation of the National Sports Education Board.

- The govt. already announced National Sports Education Board. Now it is in a formation stage and They have constituted a very-high level committee and this committee is under discussion on how to bring the national sports education board into shape.
- According to Kiran Rijuji Ex. Sports Minister Govt. of India "Sports is also an education, so sports cannot be extra-curricular activities. Thereby sports cannot be treated as an optional subject sports as part of education has to be accepted by all.

**Dr. Padmarani Rao,**  
**Professor,**  
**Yashwant College, Nanded**

---

Abstract:

Study of our ancient treasure by learning Sanskrit or by doing translation of our ancient knowledge in local language, we must implement NEP in true sense in our education system and train the youth in treasure of Indian Knowledge system.

**Mr. Murlimohan K,**

**Shri Guru Gobind Singhji Institute of Engineering and Technology (SGGSIET),**

**Nanded**

---

**Abstract:**

**New ways of thinking about Research, Creativity, Innovation**

What is 'Research'?

- How do we conduct planned investigation ?  
The premises:
- What is the most important human resource known?
- Creative concepts inspired by Nature
- Four different ways of being Creative
- The Whole Brain: Universal Thinking Styles
- What is Creativity? New ways of Thinking about things!!
- So being Creative has three components
- Who is Creative?
- Two views of Creativity
- What is Lateral Thinking?
- What is Innovation?
- Degrees of Newness
- Linear Model of Innovation
- Design Thinking
- Right solution?
- Ways of Enhancing Personal Creativity

Providing universal access to quality education is the key to India's continued ascent, and leadership on the global stage in terms of economic growth, social justice and equality, scientific advancement, national integration, and cultural preservation.

NEP 2020

Synergy in curriculum across all levels of education

No hard separation between arts and sciences

No hard separation between curricular and extra-curricular activities

No hard separation between vocational and academic streams

Education is a public service

Holistic development of learners

How to learn?

What to learn?

Experiential learning

Multilingualism

Study one or more specialized areas of interest at a deep level at a time.

## Use of Technology in Education

- NEP 2020
  - Synergy in curriculum across all levels of education
  - No hard separation between arts and sciences
  - No hard separation between curricular and extra-curricular activities
  - No hard separation between vocational and academic streams
  - Education is a public service
- Providing universal access to quality education is the key to India's continued ascent, and leadership on the global stage in terms of economic growth, social justice and equality, scientific advancement, national integration, and cultural preservation.

# Use of Technology in Education

- Indian Computer Emergency Response Team  
— <https://www.cert-in.org.in/>

### Reporting of a Security Incident

A computer security incident is any adverse event whereby some aspect of a computer system is threatened viz. loss of confidentiality, disruption of data or system integrity, denial of service availability.

Any organisation or corporate using computer systems and networks may be confronted with security breaches or computer security incidents.

By reporting such computer security incidents to CERT-In the System Administrators and users will receive technical assistance in resolving these incidents. This will also help the CERT-In to correlate the incidents thus reported and analyse them; draw inferences; disseminate up-to-date information and develop effective security guidelines to prevent occurrence of the incidents in future.

### Reporting of an Incident

System Administrators can report an adverse activity or unwanted behaviour which they may feel as an incident to CERT-In. They may use the following channels to report the incident.

E-mail : [incident@cert-in.org.in](mailto:incident@cert-in.org.in)  
Helpdesk : +91-1800-11-4949  
Fax : +91-1800-11-6969

### Contents of Incident Report

given while reporting the incident.

systems deployed, actions taken to mitigate the damage etc.
